Technical Rider Circus Marcel

For more information or questions, please contact Joppe Wouters: +32 486 80 74 08 info@circusmarcel.com

- Circus tent diameter: 20m./65.6ft
- Canvas type M2 lightproof (we have the obligatory official report concerning the fire safety of the canvas)
- minimum surface area: 27 x 35 m / 88.6 x 115 ft
- Tent has been approved by BVCTS-Mervil and is suitable for 299 people.
- Surface area must be flat, horizontal and hard. Grass is usable if the area is also accessible for heavy transport when raining. Asphalt is useable if it's possible to put in the tent pegs. When a pneumatic hammer is necessary, the organization will provide one. Clinkers/cobbles are useable but the organization is responsible for removing and putting them back where necessary.
- The subsoil must be free of all pipes. The tent will be anchored using tent pegs up to 120 cm/47 inches deep. It is advisable to request a plan with gas and water pipes with the local authority.
In case of damage the organization is the only responsible.
- No electric cords or telephone cables above the area
- No damp or muddy area and free off danger of flooding
- Easy access for trucks (also when raining), without slopes.
- Area should be protected against heavy winds.
- The organization provides at least 6 motivated people in good health for set-up and take-down of the tent and equipment.
- Enough space around the tent to put a trailer and 4 to 5 caravans/campers
- A connection to potable water close to the tent from the arrival to the departure of the circus.
- Power requirements: 63 Ampere – 3 x 400V in the vicinity of the tent, from arrival to departure of the circus.
- Bathroom facilities (toilet and shower) in the vicinity of the tent.
- Tent needs to be evacuated with wind speed of 43 mph and with heavy snowfall (more than 2 pounds/sq ft) and the heating isn't able to melt the snow.
- Quiet location, especially during the show.
